2 distinct contracts across 2 projects; 5 source supplier identities and 5 supplier-award rows.

What this tells your team

Use the project list to research the implementing organisation and programme context. Use the supplier list to understand published award history and potential competitors or partners. Verify procurement documents before acting; this edition does not identify an open competition or purchasing authority.

First release covers World Bank IPF awards only. It does not include TED, all national procurement, open opportunities or verified purchasing contacts. Source amounts are commitments, not payments. Joint-venture allocations follow the publisher's equal split; borrower country and project do not identify a verified buying organisation.

Quality: 2 contracts have multiple supplier identities in this selection; 0 rows lack a published amount. A supplier identity is based on the source ID, name and country, not a separately verified legal entity.

Source snapshot as of: 2026-09-09; retrieved: 2026-09-09T06:21:36.231076+00:00

Source-quality counts: {"source_rows": 290717, "outside_window": 263658, "invalid_date": 0, "individual_consultants": 6069, "missing_identifiers": 0, "exact_duplicates": 0}

Contract identity = project ID + WB contract number. Supplier ranking = distinct selected contracts. Only identical source records are deduplicated; conflicting allocations block publication. Source equal-split joint-venture amounts are retained, without interpreting them as actual ownership or earnings. Amounts are USD commitments using the publisher's conversion basis.

Buyer organisations, end dates and award-notice publication dates are not available in this snapshot and have not been inferred.
