

PUBLIC SAMPLE · Fictional suppliers and prices used to demonstrate the comparison.

Nobiqo & Co.

FF&E Quote & Cost Benchmark

Research / analysis date: 2026-09-09

Frozen input SHA-256: 6bb223bddc2a313abba24c6fea3b8243df35fcb5950a952e6d2203a8680d827c

FICTIONAL DEMONSTRATION — not a real supplier quotation

1 items · 2 quotations · EUR · 1 items with at least two comparable offers.

Your comparison in context

A low known subtotal is not necessarily a low final price. Blank costs stay unknown. No overall winning supplier or savings percentage is inferred from incomplete baskets. All calculations exclude tax, and currencies are not converted.

Automated analysis of your supplied CSV, not a market price database or personal consultancy. Up to 50 items and three supplier quotes in one currency. No PDF or image extraction, currency conversion, supplier verification or technical certification. Unknown costs remain unknown; equivalence must be explicitly confirmed in the input.

Supplier basket coverage

Quote / supplier	Items	Known subtotal	Complete basket
DEMO-A / FICTIONAL Supplier A	1/1	2500.00	2500.00
DEMO-B / FICTIONAL Supplier B	1/1	2350.00	2350.00

A complete basket means entered costs and item coverage are complete. Check item-level validity, equivalence and delivery terms before choosing a supplier.

Item-by-item comparison

CHAIR-01 / FICTIONAL lounge chair

Supplier	Net line total	Lead weeks	Review
FICTIONAL Supplier A	2500.00	8	Comparable on client-confirmed terms.
FICTIONAL Supplier B	2350.00	8	Lowest among comparable offers. Comparable on client-confirmed terms.

DEMO-A specification: FICTIONAL SPEC A, oak frame, fabric X

Delivery terms: Delivered to fictional site; 8 weeks after deposit / source: FICTIONAL DEMO / quote line 1

DEMO-B specification: FICTIONAL SPEC A, oak frame, fabric X

Delivery terms: Delivered to fictional site; 8 weeks after deposit / source: FICTIONAL DEMO / quote line 1

Method and responsibility

Net line total = quantity × net unit price + allocated freight + allocated installation + allocated other costs. Decimal arithmetic is used; each displayed line is rounded to two decimal places, and basket totals sum those displayed line values. The entered currency is EUR.

Cost ranking requires at least two offers with all cost fields, current declared validity, matching specification text, matching delivery terms and explicit client-confirmed equivalence. Matching text is a screening rule, not a technical assessment. Different lead-time durations are shown and not automatically scored.

Validity is evaluated on 2026-09-09. This frozen report does not refresh if quotations expire later. Source references are supplied by the customer; no original document, supplier statement or warranty has been independently verified.

No client data is added to a shared benchmark or sent to an AI model. Use internally and in this client project. A technical or procurement adviser should resolve the listed ambiguities before an order is placed.
