

PUBLIC SAMPLE: Reconstruction & Recovery Watch

Edition 20 September 2026 / Raslak Atlas

A dated register of infrastructure and resilience projects in selected crisis and disaster-affected markets, supported by a 17-market research and qualification watchlist.

Coverage and use

The project register is a selected subset of Construction & Infrastructure Atlas; this edition adds crisis-market qualification and source navigation. Country inclusion does not mean a project is caused by conflict or is open for bids. Iran is watch-only: this edition establishes no funded Iranian reconstruction opportunity. No sanctions screening, transaction clearance, site-security assessment or legal advice is included. A dated research edition, not a live feed. No personal contact list, procurement eligibility approval or guaranteed sales. Check the source and current situation before acting.

Edition, not subscription

Fixed research snapshot assembled on 20 September 2026. Source publication/approval, retrieval and review dates are different fields. Future updates are not included.

Workflow

Filter geography and relevant service. Open the original source. Verify stage, financing and authorised procurement route. Record fit, missing evidence, owner and next review before outreach.

Coverage

193 rows. The project register is a selected subset of Construction & Infrastructure Atlas; this edition adds crisis-market qualification and source navigation. Country inclusion does not mean a project is caused by conflict or is open for bids. Iran is watch-only: this edition establishes no funded Iranian reconstruction opportunity. No sanctions screening, transaction clearance, site-security assessment or legal advice is included. A dated research edition, not a live feed. No personal contact list, procurement eligibility approval or guaranteed sales. Check the source and current situation before acting.

Iran and watch-only markets

Iran is included in the 17-market research watchlist, with current official sanctions guidance. No funded or open Iranian reconstruction contract is established by this edition. Needs, funding programmes and tender calls are separate evidence classes.

Included records by stage or country
